

Timberblock cedar siding is a new product of the U-Plast Company. It's a collection from the range of U-Plast new generation siding. The classic siding now has a real wood texture. High material reliability protects the facade against any weather conditions and high color resistance preserves its appearance for many years to come. The new product is for those who want to create an inimitable appearance of the house, and thanks to the unique texture Timberblock cedar siding is impossible to be distinguished from the wood.
