

# timberblock spruce

Timberblock spruce siding is a brand new product on the market of finishing materials. New elegant form, honed to perfection wood texture, distinctly expressed with a unique pattern. The improved low-gloss acrylic polyurethane coating used at production protects the facade against UV exposure and other weather caprices for years to come. Timberblock spruce siding is customized and is presented in different colors.

Panel size: Double 4-1/2" x 10'

## Color palette

Nordic spruce

Alpine spruce
