

**NEW GENERATION
SIDING**

timberblock

CEDAR collection

Timberblock Cedar siding. It's a collection from the range of U-Plast new generation siding. This classic siding now has a real wood texture. High strength of the material protects the facade of the building against any weather conditions and high color resistance preserves its appearance for many years to come. This innovation is for those who want to create an inimitable appearance of the house, and thanks to the unique texture Timberblock Cedar siding is impossible to be distinguished from the real wood.
