

NEW GENERATION
SIDING

timberblock

OAK collection

OAK collection

Timberblock Oak siding is a unique material imitating a real wood texture. The Timberblock Oak Collection differs from any classic siding due to its special durability, universality and inimitable beauty of colors. Simplicity of installation enables transformation of any facade in the shortest possible time. Its combination with other new-generation siding collections may result in an inimitable appearance of any house.

Timberblock Oak siding is tailored to the needs of customers and is presented in different colors.
